DETAILED ACTION

Applicants' arguments filed on 9/13/2004, have been fully considered and are deemed to be persuasive to overcome some of the rejections previously applied. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn.

Applicants amendment after-final canceling claims 1, 5, 13, 23, 28, 33-43 and 45-47, and amending claim 44, in the paper of 9/13/2004, is acknowledged and has been entered. Claim 44 is pending and at issue for examination.

Allowable Subject Matter

Claim 44 is allowed.

The following is an examiner's statement of reasons for allowance: The previous rejection of claim 44 under 35 U.S.C. 103(a) as being unpatentable over Candia et al. (Development (1992) 116: 1123-1136), reference AQ of IDS) as evidenced by Candia et al. (Nucleic Acids Res. 21(21): 4982, October 1993, reference AN of IDS) is hereby withdrawn based on applicants arguments presented in the paper of 9/13/2004. With respect to claim 44, applicants argument that Candia 1 (Development Vol 116) does not suggest that a human homolog for the mouse protein known as Mox2 exists is found persuasive. Thus there is no reasonable expectation that such a protein even exists.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
